SKILLS

Linux OSs
● ● ● ● ○
Alpine, Centos, Debian, Oracle, Red Hat, Ubuntu

Windows OS
● ● ● ● ○
Windows Server, Windows for Workstations

Virtualization
● ● ● ○ ○
Docker, Hyper-V, LXC/LXD, OpenVZ, VMWare, VirtualBox, Vagrant

Automations
● ● ● ● ○
Ansible, Azure Pipelines, Gitlab CI, Jenkins, Chocolatey

Scripting
● ● ● ● ○
GNU Bash, Python, GoLang, Microsoft Batch, Powershell

Logs & Monitoring
● ● ● ● ○
Grafana, Kibana, Zabbix, Probetheus

Repositories and Artifactories
● ● ● ○ ○
Harbor, Nexus

Clusters
● ● ● ○ ○
Helm, Kubernetes, Hashicorp Vault

Other Software
● ● ● ● ○
LetsEncrypt, nginx, Postfix, Traefik, Haproxy

CRMs
● ● ○ ○ ○
Azure Devops, Jira, Notion

Documentation & Communication
Confluence, Discord, DokuWiki, Markdown, Microsoft Teams, RocketChat, Slack, Telegram

Version Control
● ● ● ○ ○
git, Bitbucket, Github, Gitlab, Gitea, Azure Devops

DBs
● ● ○ ○ ○
MariaDB, Microsoft SQL Server, MongoDB, PostgreSQL

INTERESTS

GameDev

Filmmaking Industry

LANGUAGES

Russian

ℹ️ General Info

- 👨‍💻 I'm a system administrator with 10+ years of experience
- 🐧 For the last 5 years I've been working on Linux stack
- 🪟 I also have a wide experience on Windows and Windows Server support

🔥 I'm passionate about:

- 🤖 Automations
- 🧱 "As a code" paradigm
- 📄 Making cool documentation

🌵 Current project

I came to the last project with absolutely no documentation, couple of automations on new for me stack (Azure DevOps)
What I have done on this project:

- 🚢 Ansible playbook for full deployment of infrastructure
- ♾️ Release Process for Integration and Delivery
- 🚀 Leaded the product to stable release
- 📄 The documentation for product provides all information needed for any qualified devops to support product, even if they have no experience in Azure Devops

WORK EXPERIENCE

Sibedge
(October 31, 2021 - Present)
Linux System EngineerLinux

- Documentation
- Release management
- CI/CD process
- K8s, helm, docker, compose
- Ansible, Azure-Pipelines, Microsoft Azure Devops

🔗 https://sibedge.com

Yandex Money
(December 31, 2017 - October 30, 2021)
Linux Engineer

- Supporting application production and back-office infrastructure.
- Implementing IaaC way with Ansible, Bash, Python, Docker, Docker Compose.
- Configuring Monitoring with Zabbix

IQ Option Europe Ltd
(August 31, 2017 - December 30, 2017)
Linux EngineerLinux

- Supporting Infrastructure for applications
- Ubuntu Server with LXC/LXD virtualization
- Implementing IaaC way with: Canonical MAAS, Gitlab, Gitlab CI, Ansible

🔗 https://iqoption.com/

SberTech
(February 28, 2017 - August 30, 2017)
Linux EngineerLinux

- Supporting IBM Web Application Services on RedHat and SunOS with OracleDB
- Creating Jenkins Pipelines, Ansible Playbooks

🔗 https://www.sbertech.ru/

SoftBalance
(September 30, 2014 - February 28, 2017)
IT Engineer

- Administering: Hyper-V, VMWare ESXi clusters
- Supporting: 1C, Nginx, Apache, Bitrix, MySQL, Postgresql, Linux Mail server

🔗 https://softbalance.ru/

FastVPS
(December 31, 2012 - September 29, 2014)
Technical Support EngineerTechnical

Hosting technical support:

- Virtualization: OpenVZ, Parallels Cloud System
- Supportning: nginx, apache, MySQL, Postrgres, OpenVPN, Postfix, Exim
- Jira, Confluence, Zabbix
- DNS, DKIM, SPF
